Strongbox High Performance Render Node

Strongbox have huge experience with AMD Threadrippers and were beta testers for the original 1950X Threadrippers. Since then we have built up a great respect for the abilities of the Threadripper range and we have installed a large number of these render nodes since the 32 Core 3970X launch in Feb 2020. These are ideal as single fast render nodes or the basis for concentrated CPU render farms on premises or in datacenters. We can provide these as shipped only or as a fully managed render farm. They are scalable to any number and in our experience robust and reliable
