

up to 900TB of fast access SSD Storage in a laptop sized case

Strongbox1 Example Uses:

You are running a production:

Imagine being able to secure all your frames from every camera consolidated on one device and carry it anywhere in the world to be edited.

You have 10,000,000 customer records:

Imagine being able to store all your companies most valuable data in one location, locked in a vault, un-hackable as it is not connected to any network and totally secure. And pick it up and move it whenever you want depending on socio-economic and political situations.

You have very valuable IP and coding that you want to protect:

Download it onto Strongbox1 and lock it in a safe and no one can ever steal it or adjust it without you letting them

You have a deal closing and have some unique data you know your competitors are trying to steal

Download everything onto Strongbox1 and give no one access until the deal is agreed and you are paid.

Strongbox1 gives you that freedom of securing your assets wherever you are, giving you total peace of mind in these challenging times.

Plug into a laptop, mainframe, or network and download assets from existing MAM or NAS or all your random drives. Consolidate all your data in one portable device.

Power bank available for remote locations. All cables and connectors included. Full instructions and support 24/7/365.

Fast upload and download, excellent file management, data available with total privacy when you need it.

Or you could put it in a Strongbox1....

Strongbox1 Features:

900TB of secure high capacity SSD storage in a travel friendly lockable attache sized portable carry case

Military grade encryption if stolen

Robust IP67 waterproof, dust proof and military grade approved

Raid card for secure parity storage

4x10GB Intel Adapter (40GB) NIC card for fast access

Plug into mains, car adapter or USBc

Major Benefits:

Cannot be compromised as it is not connected to a network or wireless and 100% encrypted

Enterprise SSD's for long life

Carry anywhere on the planet like a briefcase privately and securely

You can have every asset on one box only you can access privately.

A whole entities data can be stored on a Strongbox1 without the need for hugely expensive firewalls, data centre storage, cloud storage with ruinous upload and download fees, and numerous IT staff.

This is the most secure storage in existence because you control its destiny and how it is stored.
